## Global Humidity Solution !

MEET STRICT MSD HANDING STANDARD OF J-STD-033

# KUNSHAN GAOQIANG INDUSTRIAL EQUIPMENT CO.,LTD

The "Dryzone Series" Provides excellent Humidity management system

## Company Profile

Our total dedication to humidity management means that we can now offer an integrated solution that complies with J-STD-033 standard. Our preeminence in successfully helping thousands of electronic factories throughout Asia has enhanced their competitive edge through our outstanding Humidity Control System. We have also helped thousands of electric factories worldwide to upgrade their product quality which secured those clients earning repeat orders worth multibillion US dollars. To offer comprehensive services to our clients in China, sales offices and service stations were also set up in Shanghai, Kunshan, Beijing and Shenzhen in 2002.

## Our Customers

Acer | ISRO India | Panasonic | AUO | National Chip Implementation Center  
 FOXCONN | Conversion(APC) | Bose | CAMPAL | Celestica | Philips | AIDC  
 UMC | Flextronics | Kennametal | ASEGlobal | OMRON | TPO  
 TSMC | Tyco | Alcatel | Proton-Electrotex | Samsung | Jabil  
 INTEL | VLSIP | Optimax | Tex Micron | ASUS | Liteon Media | INER  
 CHIMEI | SONY | SUNPLUS | BenQ | UT Starcom | Wistron ...etc

## How does the Dryzone humidity control system improve manufacturing yield?

Following crack problems are caused by being lack of precise humidity control in manufacturing.

## Use Dryzone Products to improve the manufacturing yield.

1. Dry Storage: moisture sensitive SMD packages are exposed in the air should be stored in Dryzone C2E or E40C series for resetting the floor life.  
For example: If MSD parts of MSD Level 4,5 and 5a are exposed for less than eight hours, they can be stored in a dry cabinet for resetting the floor life. However, if their exposure time is longer than eight hours, the SMD packages should be stored at 40°C in a E40C series to reset the floor life.
2. Environmental Monitor: The temperature and humidity of production line should be kept stable. Adapt an Alarm Hygrometer HT-5D to alert the engineers when immediate action is needed. Furthermore, centralized net work monitoring function helps the engineers to manage many alarm Hygrometers on a PC at the same time.

## Select the type

TYPE	CF1	C2E	C1U	C15U	E40C	E60C
Humidity range	<1%RH	≤5%RH	1~50%RH	15~50%RH	40°C, ≤5%RH	60°C, ≤1%RH
Baking and Drying					●	●
LED Display (precision: ±1.0°C, ±2.0%RH)	●	●	●	●	●	●
Epoxy Paint (white)			●	●		
Antistatic Paint (Black)	●	●			●	●

## Select the accessories

We supply following additional modules

1. ESD safety cabinet:  $10^6 \sim 10^9 \Omega$

2. Stainless steel cabinet (SUS#304) is widely adapted in clean room.

3. Slide-shelves: it is convenient for reaching the components.

4. Nitrogen flow meter.

5. Warning light and buzzer: it will be activated when relative humidity exceeds the pre-set limit for 30 minutes.

6. ESD wheels

7. Nitrogen Filling Module (QDN):  
The nitrogen will stop as soon as the relative humidity reaches preset digital value. So nitrogen can be dramatically saved. Nitrogen doesn't need to be pumped in continuously.

# C1U | C15U

# CF1<1%RH

## Description

CF1 is specially designed for moisture sensitive devices of level 4,5,5A, or 6. The CF1 can eliminate oxidation of stored parts. So it is useful for storing parts such as precision metal parts, miniature devices, pharmaceutical substance, biotic specimens, battery, crystal, IC package module, optical lens or scientific precision instruments..etc.

<Performance>

Sample: E40C-1200-6

Humidity Range: 60°C, ≤1%RH

<Performance>

Sample: E60C-1200-6

## 40°C /60°C baking dry cabinet

E40C/E60C are plug and play machines. These auto low temp. baking dry cabinets can be stable at 40°C , ≤5%RH and 60C≤1%RH. This is specially designed for SMD packages complied with J-STD-033.

- Wider application in resetting the floor life:Moisture sensitivity SMD packages which are exposed to the air and exceed the floor life should be stored in the E40C/E60C series for resetting the floor life.(see J-STD-033 table 4-1,4-3)
- Labor cost saving: Low temp. baking dry cabinet allows customers bake SMD package with plastic tray. No more wasting time and effort removing SMD package/ components from plastic tray. It also eliminates the risk of damaging trays.

# Hygrometer

Help Managing the Temperature and Humidity of production Line!

## Function

Hygrometer is installed at precisely controlled environment, such as storage room of precious collections, production line of high tech electronic components, optical and medical industries...etc.

CP03U

## Features

- Superior visibility: Equipped with LED display, the perfect visibility can definitely avoid any ambiguous reading. It is important in many occasions.
- Improve management efficiency: Manager can be informed right away when factory/ lab/ room's RH/Temp. requirement is not fulfilled.

HT-5D

Type	CP03U	HT-5D
Operation Range	-20~65.9°C, 0.1%~99.9%RH	0~50°C, 0~90%RH
Precision	± 2%RH(1%~90%RH) ; ± 1°C(at25°C)	±1.0°C,±2.0%RH(at 50%RH/25°C)
Resolution	0.1%RH , 0.1°C	0.1°C, 0.1%RH
Dimension	W68×D45×H25mm	W310×D70×H320mm
Weight	63g	3kgs
Power	110/220V, 50/60Hz	110/220V, 50/60Hz
Visibility Distance		30m
Power Consumption(average)	2 AAA battery	12Wh

# Energy Saving N<sub>2</sub> System

NC-2M is used to control the filling of dry air into the cabinet. N<sub>2</sub>, CO<sub>2</sub> or inert gas filling will stop as soon as the pre-set humidity value is reached. For example, if 5%RH is the required condition, the dry air will stop to fill while 5%RH is reached. Over 30%~60% of N<sub>2</sub> can be saved by using our N<sub>2</sub> Saving design.

## Digital Nitrogen Controller

- Energy saving : Dry air will no longer fill continuously.
- Easy installation : Any traditional N<sub>2</sub> Cabinet can be upgraded within 20 minutes by adding NC-2M.

## Energy Saving N<sub>2</sub> Cabinet

- N<sub>2</sub> cabinet will stop as soon as the pre-set relative humidity value is reached. Tremendous waste is saved by using our N<sub>2</sub> saving design.
- If you already have traditional N<sub>2</sub> cabinet, you can choose Digital Nitrogen Controller to modify your existing N<sub>2</sub> cabinet into an energy saving cabinet.

**A** Energy Saving Nitrogen Cabinet is equipped with modules as below.

**B** Digital Nitrogen Controller can be installed on the top of nitrogen cabinet.

■ We accept customized requirements or can refer to page 4 and 5 to choose the size of cabinets

### Options

① Flow Meter will be installed outside of QDN.

## Professional Dry Cabinets

Prevention of Damp, fungus, dust, oxidation, aging and rust!

Dryzone electronic moisture proof box, file management

Most suitable for the preservation of documents, slides video(Sound) tape microfilm, optical disk, disk camera, CD...

## Advantage

- ① 28 years experiences in providing humidity management solution. Our products are user-friendly and comply with industrial grade manufacturing.
- ② Professional design by Taiwan with 32 patents and certificates worldwide including UL, CE, etc.
- ③ Provide comprehensive after-service and professional consultant service.

Humidity range  
25-55% RH
